Specialty drugs are products that treat patients with complex and/or rare disease that require intense clinical monitoring to manage severe side effect, frequent adjustments in dosage, and/or specialized training for handling and/or administration.

Some manufacturers limit the distribution of specialty drugs. These drugs are only available through designated pharmacies.

PLEASE NOTE: Not all the drugs listed are covered by all prescription drug benefit programs; check your benefit materials for the specific drugs covered and the copayments of your prescription drug benefit program.
